Cookies and other web technologies we use

Some personal information may be collected automatically, without your knowledge, whilst navigating through and interacting with the content of our websites. The electronic methods of collection we use include cookies, log files and web beacons.

Cookies are a small text or pixel file stored on your device that records information about your visit to our websites. We use cookies to improve your website experience, to serve you with relevant information and to manage your access to certain parts of our websites. You can choose if and how a cookie will be accepted by changing your browser settings; but please be aware that this may affect your access to some parts of our websites.

Web beacons are small pixel files that help us better manage content on our websites by allowing us to understand usage patterns, fix issues and improve the products and services offered to you on our websites. Log files contain information about the devices and browsers used to access our websites and help us to diagnose problems, analyse trends, administer the site or mobile application.

The information we collect by these electronic means is generally not stored for long — they are temporary records — and can include device-specific data or log data such as your IP address, device screen size, device type, browser information, referring domain, pages visited, the date and time website pages were visited and geographic location (country only).
